

RELATIVITY FEST

September 25 – 27, 2024

Chicago

JUSTIFY YOUR TRIP TO RELATIVITY FEST

What is Relativity Fest?

Every year, thousands from the legal technology community attend Relativity Fest to discover faster, better ways to work. It's the premier conference of its kind. The conference challenges attendees to rethink how they overcome complex legal data challenges with engaging panel discussions, learning labs, breakout sessions, and insights from leaders in the industry – from federal judges and analysts to Relativity super users and developers.

Relativity Fest 2024 will take place September 25 – 27 at the Hyatt Regency in Chicago. We can't wait to have our entire community together in one place. Relativity is committed to understanding the plague of data challenges affecting the industry and offering the best tools to help navigate them. This year's conference will cover data privacy, building trust in AI, and of course, in *highest* demand, Relativity aiR. You don't want to miss it.

Take a look for an idea of what to expect in 2024:

Actionable Education

Relativity Fest is more than just great ideas. You'll leave with tactical ways to work smarter and grow your services or skills.

- 100+ educational sessions
- Learning labs and workshops
- 8 RCE credits towards your RCA
- 4 RCE credits toward your specialist certification
- 10 CLE credits

New Connections

By attending Relativity Fest in-person you'll have plenty of opportunities to meet and connect with others in the industry.

- 2,000+ attendees
- Unique and engaging networking opportunities

A Fresh Perspective

Relativity Fest brings together professionals from every discipline, helping you see tough problems in a new way.

- Lit Support
- Law Firms
- Corporations
- Government Agencies
- Developers
- Industry Analysts
- Federal Judges
- Relativity Team

A Voice at the Table

Relativity Fest doesn't shy away from covering the industry's most pressing issues — it tackles them head on. You'll have the opportunity to be a part of the conversations happening at the forefront of AI innovation and get a feel for what's coming.
